5. CENTERS FOR DISEASE CONTROL: "Persons Aged 50 and Over." (March 2008). "The number of persons aged 50 years and older living with HIV/AIDS has been increasing in recent years. This increase is partly due to highly active antiretroviral therapy (HAART), which has made it possible for many HIV-infected persons to live longer, and partly due to newly diagnosed infections in persons over the age of 50." The purpose of this website is provide information on, and support for, people living with HIV/AIDS.
