

The Joseph L. Parkin Memorial Lecture on Aging

The Parkin lectureship was endowed by a gift from the Retirement Research Foundation of Chicago, Illinois, in memory of Joseph Parkin, a former president of the Foundation who attended The University of Iowa. The lecture focuses on aspects of research, practice, or policies that affect the elderly population.

Past Parkin Lectures:

2005	Stephen J. McPhee, M.D.	Care at the End of Life: Addressing Needs of Patients and Families
2003	Leonard Hayflick, PhD	The Biology of Human Aging and Longevity Determination
1999	Philip D. Sloane, M.D., MPH	New Developments in the Care of Older Persons: Impact of Assisted Living on Nursing Homes
1998	Burton V. Reifler, MD, MPH	Mental Health and Aging
1997	Richard J. Caselli, MD	Focal & Asymmetric Cortical Degeneration Syndromes
1996	William R. Hazzard, MD	Why Women Live Longer than Men: Social/Cultural versus Biomedical Mechanisms and Implications for Healthcare in Society in the 21 st Century
